

Course Summary

The objectives of Master Your High Notes are accomplished by achieving release, balance and coordination in your tone in all registers with smooth, even vibrato.

Each exercise lays the foundation for the next. It's likely you won't achieve all this the first time through the course. Like going to the gym, you don't walk in out-of-shape and walk out an hour later in top physical condition! Normally it takes consistency, regular practice, following the directions as given.

If you can't do an exercise, go back to a previous course or review the explanations and demonstrations. How closely are you doing them as shown? With practice and consistency, you will get results.
